

What are you doing to ensure that State AED Laws are being followed? Do you want an economical AED & first aid program at all your locations?

First Voice is helping organizations to win the war against the nation's leading killer, Sudden Cardiac Arrest (SCA). First Voice provides a full line-up of automated external defibrillator (AED) and first aid solutions with convenient and high-value options.

No matter what AED you buy – that is only part of the solution. While Good Samaritan language protects users of AEDs, companies and organizations that purchase AEDs have to abide by their state's civil liability immunity laws for AED acquirers. Many AED distributors historically have not provided the correct guidance to their customers regarding this blanket of legal protection. First Voice will make sure you purchase the right AED for the right environment and provide you a complete solution that creates synergies in your AED & first aid programs.

The complete First Voice AED package includes the following complimentary components that no other supplier provides.
